SUMMARY

Computer Science and Design undergraduate with expertise in Cloud Computing, DevOps, and Software Development. Skilled in AWS, Google Cloud, Git, Jenkins, Linux, CI/CD, and cloud-based application deployment. Experienced in developing secure cloud solutions, implementing deployment workflows, and building scalable applications through internships and project-based learning. Passionate about leveraging cloud technologies to design reliable, efficient, and scalable systems.

EDUCATION

BGS College of Engineering and technology	B.E Computer science and design VTU	2023-27	CGPA: 8.7/10
KMWA PU College	12th Grade PCMC	2021-23	80.3%
Lourdes High School	SSLC	2020	95.2%

TECHNICAL SKILLS

Languages : Java, Python, SQL, C/C++, HTML/CSS/JS, Git.

Cloud Platforms & Databases : AWS, Google Cloud, MongoDB Atlas, MySQL

DevOps & Automation : Git/GitHub, Jenkins, CI/CD, Cloud Storage, Deployment Automation, Linux

Networking : CCNA, Cisco Packet Tracer, Deployment Automation, Network Security, DNS Management

PROJECTS

1. AI-Powered Synthetic Data Generation Platform

2026

Python | Cloud Computing | Machine Learning

- Developing a privacy-preserving synthetic data generation platform capable of producing statistically accurate datasets for banking and analytics applications.
- Designed to enhance data availability for machine learning while maintaining privacy, security, and data utility.

2. Secure Vault

2026

React.js | Node.js | MongoDB Atlas | AWS S3 | JWT

- Engineered a secure cloud storage platform integrating AWS S3 and MongoDB Atlas for scalable file management and storage.
- Implemented AES-256 encryption, JWT authentication, and secure file sharing to enhance cloud security and data accessibility.

3. Habit Pulse

2025

Kotlin | Google Sheets API

- Created an Android application with cloud-based data synchronization and real-time habit tracking capabilities.
- Integrated Google Sheets API for lightweight cloud storage and data management.

4. Anjaneya Gold Company Website

2025

HTML | CSS | JavaScript | GitHub Pages

- Designed and deployed a business website using GitHub Pages with custom domain integration and DNS configuration.
- Utilized Git and GitHub for version control, deployment management, and website maintenance.

EXPERIENCE

DevOps Trainee | SMAG-J Enterprises

2026

- Built and tested CI/CD pipelines using Git, Jenkins, and Linux as part of a 3-day DevOps training program covering software integration, testing, and deployment automation.
- Applied version control, build automation, testing workflows, and deployment lifecycle management across multiple hands-on DevOps exercises and deployment scenarios.

CERTIFICATIONS

Infosys Springboard – Cyber Security Foundation

Infosys Springboard – Securing CloudOps Deployments

Cisco CCNA (Introduction to Networks)

Cisco CCNA (Switching, Routing and Wireless Essentials)

Cisco CCNA (Enterprise Networking, Security and Automation)

SMAG-J Enterprises – End-to-End DevOps
