SUMMARY

Artificial Intelligence Intern building AI-powered learning assistants and machine learning applications that support student productivity. Develops and tests models using Python, NLP, and Scikit-Learn, with work spanning data preprocessing, feature engineering, and model evaluation. Focuses on practical, scalable AI solutions for real-world problems.

EDUCATION

BGS College of Engineering and technology	B.E Computer science & design VTU	2023-27	CGPA: 8.7/10
KMWA PU College	12th Grade PCMC	2021-23	80.3%
Lourdes High School	SSLC	2020	95.2%

TECHNICAL SKILLS

Languages : Java, Python, SQL, HTML/CSS/JS,Git.

AI & ML :NLP, TF-IDF, Scikit-Learn, Generative AI, Data Preprocessing, Feature Engineering, Classification Models, Model Evaluation

PROJECTS

1. AI-Powered Synthetic Data Generation Platform

2026

Python | Machine Learning | Cloud Computing

 - Developing a privacy-preserving synthetic data generation platform capable of producing statistically accurate datasets for banking and analytics applications.
 - which is used to enhance data availability for machine learning while maintaining privacy, security, and data utility.
2. AI Study Pal

2026

Python | NLP | Machine Learning

 - Engineered an AI-powered study assistant that converts PDF notes into intelligent summaries, quizzes, and personalized study plans to enhance learning efficiency.
 - Applied Natural Language Processing and Machine Learning techniques to automate content analysis and provide personalized academic support.
3. SMS Spam Detection Web Application

2025

Python | Streamlit | Scikit-Learn | NLP

 - Built a machine learning-based SMS spam classifier achieving approximately 97% accuracy using TF-IDF vectorization and NLP techniques.
 - Created an interactive Streamlit application for real-time message classification and spam detection.
4. Estate-IQ

2025

Python | Machine Learning | Predictive Analytics

 - Built a predictive analytics platform for house price estimation using machine learning algorithms and real-estate datasets.
 - Performed data preprocessing, feature engineering, and model evaluation to generate accurate property value predictions.

EXPERIENCE

- Artificial Intelligence Intern | *Launched Global*

2026

 - Built AI Study Pal, an AI-powered learning assistant designed to enhance student productivity and academic support.
 - Applied Artificial Intelligence and Machine Learning concepts throughout the project lifecycle, including development, testing, and implementation.

CERTIFICATIONS

- IBM SkillsBuild – Artificial Intelligence Fundamentals
- NPTEL (Elite) – Mobile Virtual Reality and Artificial Intelligence
- Infosys Springboard – Introduction to Machine Learning
